IE Intranet Security Options for SharePoint
By Scott Badger

Use these options to limit authentication prompts from Internet Explorer when you use RIC’s SharePoint server.

1. In your browser, select **Internet options** from the Tools menu.
2. Click the **Security** tab and click **Local Intranet**.

3. Click the **Sites** button.

4. Uncheck “**Automatically detect intranet network**” and click the **Advanced** button.
5. Click **Add** and input the names of the sites listed above: http://portal2.ric.edu and http://mysites2.ric.edu. Add the sites individually clicking **Add** before adding each site. When the sites have been added, click **Close**.

6. Click **OK** twice to close the Local intranet and Internet Options windows.
